rolearch

A GUIDE FOR CAREER ADVISORS

Help students apply where they actually fit.

Rolearch is a free job platform that reads every posting it lists and tags the skills employers ask for. Students see which roles their experience already qualifies them for, what's missing, and what to do next. You get a shared, evidence-based starting point for every appointment.

2.1M+
open jobs, straight from employers

355
roles measured skill by skill

23
industries in the monthly Skills Report

Free tools to use with students

Resume check for any job
rolearch.com/ats

Paste a posting and a resume to see the match score, missing keywords and formatting problems. The resume is never stored.

Career paths
rolearch.com/careers

What each role asks for, measured from live postings, and which roles a student's skills carry over to.

Career roadmaps
rolearch.com/roadmaps

Free roadmaps for hundreds of careers: the skills in order, practice projects, licenses that matter and checked free resources.

Skill tests
rolearch.com/skills

Proctored tests that earn a verified badge at 90% or more. Proof of a skill, not just a line on a resume.

Interview prep
rolearch.com/interview

Practice questions built from the real job description and the student's resume, with feedback on answers.

Skills Report
rolearch.com/reports/skills

Monthly data on the skills employers ask for by industry, including AI. Useful for workshops and class talks.

A 30-minute appointment

1. **Before:** the student creates a free account and uploads their resume. Rolearch suggests roles that fit.
2. **Together:** open a job they want and run the fit check. Talk through the proven skills and the gaps.
3. **Plan:** pick one gap, open its roadmap or skill test, and agree a next step.
4. **Follow up:** the student tracks applications in Rolearch, so the next meeting starts from real progress.

Good to know

- Free for students, with no card needed.
- Resume suggestions are tied to the student's real experience. Nothing is invented.
- Jobs come straight from employers' own career sites.
- Works for career changers and students without a clear target role yet.
